

## M.E.2 Wire Cable Tray

### M.E.2 Cable Tray CAD drawings

- Factory fabricated junctions save installation time and cut costs.
- Seven or 10 foot length straight tray sections can be cut to length or formed by cutting side wires to change routing elevation at the installation site.
- Two x 4 inch grid provides easy cable routing in or out of tray sections.
- Available metal tray divider for cable separation.
- Rigid steel construction &ndash; Made in the USA.
